

STATEMENT TO SOUTH PACIFIC STOCK EXCHANGE 9th November 2017

Communications Fiji Ltd completes \$1 million investment program in 2017

The South Pacific’s largest broadcaster, Communications Fiji Ltd, announced today that the company had completed its capital investment plan for 2017 with the installation of state of the art studio, programming and client management technology.

“We are very excited with this new development” said Ian Jackson, General Manager, “it impacts on every aspect of our broadcast operations”.

The Zetta broadcast system drives all on air and studio operations, G Selector radio programming and Aquira manages all client advertising bookings. All products are designed by supplier Radio Computing Services to seamlessly interlink with each other and with various online services.

“We have only just scratched the surface of the potential of this new technology” said Ian Jackson “over next twelve months listeners and advertisers will notice big changes so stay tuned!” .

CFL invested close to half a million dollars in the upgrade. “I am particularly pleased with the way in which the CFL team has managed the upgrade. This was a complex project that was delivered without any major disruptions “said Mr. Jackson.

With the Fiji project completed CFL is now in the final stages of planning a similar upgrade at its Papua New Guinean operations PNG FM LTD.

This new investment comes on top of the upgrade of transmission facilities in the Northern Division announced earlier this year. “It has been a busy year CFL has invested just over \$1 million in upgrading our technology across the country and as we head into the cyclone season our engineering teams are hard at work making sure we are ready”, said Mr. Jackson

Investment was funded directly out of cash flow and hasn’t required any additional debt facilities.
