

**VaiWai® sponsors water projects for Batibalavu school and Viani village- Changing Lives**

In celebration of World Water Day, March 22<sup>nd</sup> 2021, Pleass Global Limited attended two project commissioning events in Cakaudrove Province sponsored by Pleass' VaiWai® Natural Artesian Water. The projects were the result of the hard work and collaboration of Rotary Pacific Water, donors and Government and brought life-changing effects to these communities.

Batibalavu school and Viani village were previously faced with water systems that did not meet their needs and relied on water supply from various untreated sources to meet their daily demand and were often subjected to common water borne diseases. Rotary Pacific Water provided this intervention in line with Sustainable Development Goal #6 and the Fijian Government's National Development Plan. The project commissioning also coincides with the **World Water Day 2021 commemoration** with the theme "**Valuing Water**".

The commissioning of these two projects is yet another step in the continuing platinum donor relationship of the VaiWai® Natural Artesian Water brand and Rotary Pacific Water and the essential delivery of sustainable water and sanitation projects to communities in need.
