For Public Release

17 September 2025

FILIAN HOLDINGS LIMITED FY25 AUDITED ACCOUNTS

Fijian Holdings Limited (FHL) Group recorded a consolidated Net Profit Before Tax (NPBT) of \$60.3 million for the year ended 30 June 2025, against a challenging operating environment marked both by depressed demand and compressed margin. Whilst the financial result was 14% lower than for FY2024, the Group achieved several major milestones during the year in line with its strategic agenda and purpose.

The FHL Tower achieved occupancy certification in June 2025, completing a high-end landmark building in Suva and a significant milestone in the Group's property portfolio. In partnership with Nawaibuta Properties Pte Limited, FHL also commenced a new commercial development in Korovou, Tailevu marking one of its Impact Investments, with commitments of up to \$50 million for joint ventures with resource owners. This will be the first on many investments underlining FHL's commitment to inclusive and sustainable development.

Merchant Finance Limited strengthened its market presence through innovative new product offerings to segments that are not well-served by traditional financiers. Its loan book surpassed the \$200 million mark during FY2025. South Sea Cruises continued to be the Group's flagship performer, further expanding its offerings through investments in new assets to capitalize the robust growth in the tourism sector.

Strong contributions from South Sea Cruises, RB Patel Group, and Merchant Finance helped offset headwinds in other sectors, including a weaker performance from Basic Industries and a reduction of \$3.5 million in share of profits from associates.

At the Holding Company level, FHL recorded a profit before tax of \$18.7 million, compared to \$16.9 million in FY2024. Dividend revenues improved during the year, supported by higher distributions from South Sea Cruises, FHL Fund Management, and FHL Media.

The Chairman, Mr. Rokoseru Nabalarua, said: "FY2025 has been a year of both achievements and challenges. Our landmark projects and subsidiary performance demonstrate the strength and diversity of FHL's portfolio. The Group remains committed to exploring new opportunities, while maintaining a disciplined approach to debt and capital deployment. Looking ahead, we remain mindful of global uncertainties, inflationary pressures, and geopolitical risks, but confident in FHL's ability to adapt, grow, and deliver value for all stakeholders."

As of 30 June 2025, FHL's net assets stood at \$707.4 million, an increase from \$648.9 million in FY2024 reflecting continued growth in investments and capital expansion across the Group.

FHL's FY2025 performance reinforces its strategic direction of "Growing into New Frontiers in Pursuit of our Purpose."

Directors' report

In accordance with a resolution of the Board of Directors, the directors of Fijian Holdings Limited ('the Company") present their report together with the financial statements of the Company and the Fijian Holdings Limited Group ("the Group") being the Company, its controlled entities (see note 21 for investments in subsidiaries, individually referred to as "group entities") and associates for the year ended 30 June 2025.

1. Directors

The following were directors of the Company at any time during the financial year and up to the date of this report:

Rokoseru Nabalarua - Chairman Sakiusa Raivoce - Deputy Chairman

Anthony Whitton

Litiana Loabuka - Retired on 31 October 2024
Ilimotama Cawi - Re-appointed on 31 October 2024
Alifereti Kikau - Retired on 31 October 2024

Kamal Haer Semi Lotawa Anare Jale

Marica Rokovada - Appointed on 31 October 2024 Savenaca Seniloli - Appointed on 31 October 2024

2. Principal activity

The principal activity of the Company is investment. The principal activities of the Group are the production and sale of cement, concrete and concrete products, investment and rental of property, fund management, stock broking, asset and loan financing and acceptance of term deposits, provision of sea transportation services and boat charters, cruise ship operations, commercial free to air broadcasting services, selling and servicing of radio transmitters, television and communications, retailing and wholesaling of general merchandise, and owners and administrators of properties.

3. Trading results

The profit after income tax of the Group attributable to the members of the Company was:

	2025 \$'000	2024 \$'000
Profit attributable to equity holders of the Company	34,027	40,445
The profit after income tax of the Company was: Profit after tax	18,622	16,169

4. Dividends

The directors declared and paid a final dividend of \$Nil (2024: \$Nil) from the profits for the year ended 30 June 2025. The Company declared \$8.225 million (2024: \$6.093 million) in interim dividend and \$Nil (2024: \$2.011 million) in special dividend during the year.

5. Bad and doubtful debts

The directors took reasonable steps before the Company's and the Group's financial statements were prepared to ascertain that all known bad debts were written off and adequate allowance was made for expected credit loss.

At the date of this report, the directors are not aware of any circumstances which would render the amount written off for bad debts, or the amount of the allowance for expected credit loss, inadequate to any substantial extent.

Directors' report (continued)

6. Assets

The directors took reasonable steps before the Company's and the Group's financial statements were prepared to ascertain that the assets of the Company and the Group were shown in the accounting records at a value equal to or below the value that would be expected to be realised in the ordinary course of business.

At the date of this report, the directors are not aware of any circumstances which would render the values attributable to the assets in the financial statements misleading.

7. Significant events

Acquisition of Shareholding in Higgins Holdings (Fiji) Pte Limited

On 31 July 2024, FHL successfully completed the acquisition of a 25% equity interest in Higgins Holdings (Fiji) Pte Limited. Higgins Holdings is the parent company of Fletcher Building (Fiji) Limited, which operates in Fiji under the Fletcher and Higgins brands and is affiliated with Fletcher Building Limited.

Proposed Acquisition of Additional Interest in Port Denarau Marina Limited

On 4 June 2025, FHL announced the execution of a share sale agreement with Skeggs Group Limited for the proposed acquisition of Skeggs' 23.5% shareholding in Port Denarau Marina Limited (PDML). Subject to the successful completion of the transaction, FHL's ownership in PDML would increase from 27.5% to a controlling interest of 51%.

FHL Tower Development Milestone

FHL Tower, which represents the Group's largest capital investment to date, was granted its occupancy certificate in June 2025. This marks a key milestone in the development of the asset.

Operational Disruption at Pacific Cement Limited

In March 2025, Pacific Cement Limited (PCL), a subsidiary of the Group, experienced a temporary halt in cement production due to a major breakdown of its cement mill. The repair process took over three months, with full operational capacity restored in June 2025. This unplanned outage contributed to a significant shortage of cement supply in the domestic market during the period.

8. Related party transactions

In the opinion of the directors all related party transactions have been adequately recorded and disclosed in the financial statements of the Company and the Group entities.

9. Other circumstances

At the date of this report, the directors are not aware of any circumstances not otherwise dealt within this report or financial statements which render any amounts stated in the financial statements misleading.

10. Unusual transactions

The results of the Company's and the Group's operations during the financial year have not, in the opinion of the directors, been substantially affected by any item, transaction or event of a material and unusual nature other than those disclosed in the financial statements.

11. Events subsequent to balance date

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely, in the opinion of the directors of the Company, to affect significantly the operations of the Company and the Group, the results of those operations, or the state of affairs of the Company and the Group, in subsequent financial years.

12. Going concern

The directors consider that the Company and the Group will continue as a going concern. The directors believe that the basis of preparation of financial statements is appropriate and the Company and the Group will be able to continue its operations for at least 12 months from the date of signing this report.

Directors' report (continued)

13. Directors' interests

Interests of directors and any additions thereto during the year and up to the date of this report in the ordinary shares of the Company are as follows:

	Benefic	ially	Non-beneficially				
	Additions	Holding	Additions	Holding			
Sakiusa Raivoce	-	1,213,000		-			
Rokoseru Nabalarua	147	15,309	-	-			

No director of the Company has, since the end of the previous financial year, received or become entitled to receive a benefit (other than a benefit included in the total amount of emoluments received or due and receivable by directors as shown in the financial statements) by reason of a contract made by the Company or related corporation with the director or with a firm of which the director is a member, or with a company in which the director has a substantial financial interest.

For and on behalf of the Board of Directors by authority of a resolution of the Directors.

Dated this 17 day of September 2025.

Chairperson Director

STATEMENT BY DIRECTORS'

In the opinion of the directors:

- (a) the accompanying statements of profit or loss and other comprehensive income of the Company and the Group are drawn up so as to give a true and fair view of the results of the Company and the Group for the year ended 30 June 2025;
- (b) the accompanying statements of financial position of the Company and the Group are drawn up so as to give a true and fair view of the state of the affairs of the Company and the Group as at 30 June 2025;
- (c) the accompanying statements of changes in equity of the Company and the Group are drawn up so as to give a true and fair view of the movement in shareholders' funds for the year ended 30 June 2025;
- (d) the accompanying statements of cash flows of the Company and the Group are drawn up so as to give a true and fair view of the cash flows of the Company and the Group for the year ended 30 June 2025;
- (e) at the date of this statement, there are reasonable grounds to believe that the Company and the group entities will be able to pay their debts as and when they become due and payable;
- (f) all related party transactions have been adequately recorded in the books of the Company and the group entities; and
- (g) the financial statements have been prepared in accordance with the Companies Act 2015.

For and on behalf of the Board of Directors by authority of a resolution of the Directors.

Dated this ____ day of September 2025.

Chairperson

Director

Lead Auditor's Independence Declaration under Section 395 of the *Companies Act 2015*

To the Directors of Fijian Holdings Limited

I declare that, to the best of our knowledge and belief, in relation to the audit of Fijian Holdings Limited for the financial year ended 30 June 2025, there have been:

- no contraventions of the auditor independence requirements as set out in the Companies Act 2015 in relation to the audit; and
- ii. no contraventions of any applicable code of professional conduct in relation to the audit.

KPMG.

Sharvek Naidu *Partner*

Suva, Fiji 17 September, 2025

Independent Auditor's Report

To the shareholders of Fijian Holdings Limited

Report on the audits of the Financial Reports

Opinions

We have audited the consolidated *Financial Report* of Fijian Holdings Limited (the Group Financial Report). We have also audited the *Financial Report* of Fijian Holdings Limited (the Company Financial Report).

In our opinion, each of the accompanying Group Financial Report and Company Financial Report of Fijian Holdings Limited are in accordance with the *Companies Act 2015*, including:

- giving a true and fair view of the Group's and the Company's financial position as at 30 June 2025 and of its financial performance for the year ended on that date; and
- complying with International Financial Reporting Standards.

The respective *Financial Reports* of the Group and the Company comprise:

- Statements of financial position as at 30 June 2025:
- Statements of profit or loss and other comprehensive income, Statements of changes in equity, and Statements of cash flows for the year then ended; and
- Notes including a summary of material accounting policies.

The *Group* consists of Fijian Holdings Limited (the Company) and the entities it controlled at the yearend or from time to time during the financial year.

Basis for opinions

We conducted our audits in accordance with the *International Standards on Auditing*. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audits of the Financial Reports* section of our report.

We are independent of the Group and Company in accordance with the ethical requirements of the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), together with the *Companies Act 2015* and the ethical requirements that are relevant to our audits of the Financial Reports in Fiji. We have fulfilled our other ethical responsibilities in accordance with these requirements.

We confirm that we have remained independent as required by the Code throughout the period of our audits and to the date of this Auditor's Report.

KPMG, a Fiji partnership, is part of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. Key Audit Matters

The Key Audit Matters we identified are:

- Valuation of goodwill on consolidation of South Sea Cruises Pte Limited (the Group); and
- Valuation of unlisted securities (the Company).

Key Audit Matters are those matters that, in our professional judgement, were of most significance in our audits of the Financial Reports of the current period.

These matters were addressed in the context of our audits of each of the Financial Reports as a whole, and in forming our opinions thereon, and we do not provide separate opinions on these matters.

Valuation of goodwill on consolidation of South Sea Cruises Pte Limited (\$41m) – the Group

Refer to Note 3.9, Note 3.10 and Note 19(b) to the Financial Report

The key audit matter

A key audit matter for us was the Group's annual impairment testing of goodwill related to South Sea Cruises Pte Limited, given the size of the balance (being 4% of total assets). Certain conditions impacting the Group increased the judgement applied by us when evaluating the evidence available. We focussed on the significant forward-looking assumptions the Group applied in their value in use model, including:

- Forecast cash flows, growth rates and terminal growth rates – the Group has experienced significant growth as a result of record visitor arrivals to Fiji.
 - The uncertainty of their continuation increases the possibility of goodwill being impaired, plus the risk of inaccurate forecasts or a significantly wider range of possible outcomes for us to consider. We focused on what the Group considers as its future business model when assessing the feasibility of the Group's forecast cash flows.
- discount rate this is complicated in nature and will vary according to the conditions and environment the specific Cash Generating Unit (CGU) is subject to from time to time, together with the model's approach to incorporating these risks into either the forecasted cash flows or the discount rate. We involve our valuations specialists with this assessment.

The Group uses a complex model to perform their annual testing of goodwill for impairment. The model is largely manually developed, uses adjusted historical performance, and a range of internal and

How the matter was addressed in our audit

Working with our valuation specialists, our procedures included:

- considering the appropriateness of the value in use method applied by the Group to perform the annual impairment test of goodwill against the requirements of the accounting standards.
- assessing the integrity of the value in use model used, including the accuracy of the underlying formulas applied.
- comparing the forecast cash flows contained in the value in use model to Board approved forecasts.
- assessing the accuracy of previous Group forecasts to inform our evaluation of forecasts incorporated in the model.
- working with our valuation specialists we challenged the Group's significant forecast cash flows and growth assumptions in light of the expected continuation of strong growth in the tourism industry. compared key events to the Board approved plan and strategy. We applied increased scepticism to forecasts in the areas where previous forecasts were not achieved. We compared forecast growth rates and terminal growth rates to published studies of industry trends and expectations, and considered differences for the Group's operations. We used our knowledge of the Group, their past performance, business and customers, and our industry experience.
- checking the consistency of the growth rates to the Group's stated plan and

external sources as inputs to the assumptions. Complex modelling, using forward-looking assumptions tend to be prone to greater risk for potential bias, error and inconsistent application. These conditions necessitate additional scrutiny by us, in particular to address the objectivity of sources used for assumptions, and their consistent application.

We involved valuation specialists to supplement our senior audit team members in assessing this key audit matter.

- strategy, past performance of the Group, and our experience regarding the feasibility of these in the industry and economic environment in which they operate.
- independently developing a discount rate range considered comparable using publicly available information for comparable entities, adjusted by risk factors specific to the Group and the industry it operates in.
- considering the sensitivity of the model by varying key assumptions, such as forecast growth rates, terminal growth rate and discount rate, within a reasonably possible range. We did this to identify those assumptions at higher risk of bias or inconsistency in application and to focus our further procedures.
- assessing the disclosures in the financial report using our understanding obtained from our testing and against the requirements of the accounting standards.

Valuation of unlisted securities (\$702 m) - the Company

Refer to Note 3.4 and Note 20 to the Financial Report

The key audit matter

Valuation of unlisted securities is a key audit matter due to:

- the size of the balance, which represents 88% of the Company's total assets; and
- the complexity of valuation models and techniques applied in estimating the fair value of the underlying investments held by the Company, particularly where the valuation of the investee company was not observable in the market. This necessitated additional audit focus on the suitability and consistency with generally accepted valuation principles used by the Company, specifically the dividends capitalisation, market comparison and net tangible asset valuation techniques.

The Company uses fair value models for each of these valuation techniques and we focused on the key inputs and assumptions including:

- capitalisation rates;
- o recoverable amount of net tangible

How the matter was addressed in our audit

Working with our valuation specialists, our procedures included:

- assessing the valuation techniques used by the Company against the requirements of the accounting standards.
- considering the sensitivity of the Company's valuations by varying key assumptions, such as capitalisation rates, adjusted market multiples and forecasted earnings, within a reasonably possible range, to identify those assumptions at higher risk of bias or inconsistency in application and to focus our further procedures
- assessing the significant unobservable inputs in the Company's investee company valuations of capitalization rates, adjusted market multiples, forecasted earnings and recoverable amount of net tangible assets as follows;
 - comparing investee companies' net tangible assets included in the Company's net tangible assets valuations to the respective audited

assets:

- o forecasted earnings; and
- o adjusted market multiples.

The models used are largely manually developed, using internal sources as inputs to the assumptions. Complex modelling, particularly unobservable inputs, tend to be prone to greater risk for potential bias, error and inconsistent application. These conditions necessitate additional scrutiny by us.

We focused on gathering evidence in respect to the valuation techniques used by the Company and the significant unobservable inputs used in the Company's valuation techniques.

We involved valuation specialists to supplement our senior audit team members in assessing this key audit matter.

- financial statements of the investee companies.
- comparing investee companies' forecasted earnings included in the Company's market comparison valuations to the respective audited financial statements and Board approved forecasts of the investee companies.
- assessing the accuracy of previous investee companies' forecasts to inform our evaluation of investee companies forecasted earnings incorporated in the Company's fair value models.
- comparing Price Earnings ratios/EBITDA multiples included in the Company's market comparison valuations technique to adjusted market multiples derived from quoted prices of companies comparable to the investee companies adjusted for the effect of control, size, country risk and the nonmarketability of the equity securities.
- comparing trends of dividends received to profitability of investee companies over the last three years to inform our evaluation of the future maintainable dividends under the dividends capitalisation technique.
- comparing capitalisation rates included in the Company's dividends capitalisation technique to capitalisation rates derived from quoted prices of companies comparable to the investee companies adjusted for the effect of control, size, country risk and the nonmarketability of the equity securities.
- determining the fair value of investee companies using market multiples and capitalisation rates independently developed by our valuations specialists and comparing it against the fair value determined by the Company.
- considering events occurring subsequent to the year end up until the date of this audit report and their impact to the Company's valuations and the results of our work.
- assessing the appropriateness of disclosures in the financial report in respect of unlisted securities against the requirements of the accounting standards.

Other Information

Other Information is financial and non-financial information in Fijian Holdings Limited's Annual Report, which is provided in addition to the Financial Reports and the Auditor's Report. The Directors are responsible for the Other Information.

The Other Information we obtained prior to the date of this Auditor's Report was the Directors' Report and South Pacific Stock Exchange listing requirements. The 2025 Year in Review, FHL Investment Portfolio by Sector, FHL Investment Portfolio by Subsidiaries/Associates, Financial Highlights, Chairman's Address, GCEO's Report, Corporate Governance Statement, Board of Directors, FHL Group Management, FHL Management Team, Governance: Sub-Committee Reports and Top 20 Shareholders are expected to be made available to us after the date of the Auditor's Report.

Our opinions on the Financial Reports do not cover the Other Information and, accordingly, we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audits of the Financial Reports, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Reports or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

We are required to report if we conclude that there is a material misstatement of this Other Information. When we read the annual report, if we conclude that there is a material misstatement therein of this Other Information, we are required to communicate that fact. Based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report in relation to the Directors' Report and South Pacific Stock Exchange listing requirements.

Responsibilities of the Directors for the Financial Reports

The Directors are responsible for:

- preparing Financial Reports that give a true and fair view in accordance with *International Financial Reporting Standards* and the *Companies Act 2015*;
- implementing necessary internal control to enable the preparation of Financial Reports that give
 a true and fair view and are free from material misstatement, whether due to fraud or error; and
- assessing the Group and Company's ability to continue as a going concern and whether the use
 of the going concern basis of accounting is appropriate. This includes disclosing, as applicable,
 matters related to going concern and using the going concern basis of accounting unless they
 either intend to liquidate the Group and Company or to cease operations, or have no realistic
 alternative but to do so.

Auditor's responsibilities for the audits of the Financial Reports

Our objective is:

- to obtain reasonable assurance about whether each of the Financial Reports as a whole are free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinions.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *International Standards on Auditing* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Reports.

As part of the audits in accordance with the International Standards on Auditing, we exercise

professional judgement and maintain professional scepticism throughout the audits. We also:

- Identify and assess the risks of material misstatement of the Financial Reports, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from
 error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the
 override of internal controls.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group or Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group or Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the Financial Reports or, if such disclosures are inadequate, to modify our opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Financial Reports, including the disclosures, and whether the Financial Reports represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the Group Financial Report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits and significant audit findings, including any significant deficiencies in internal control that we identify during the audits.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audits of the Financial Reports of the current period and are therefore the Key Audit Matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit.

In our opinion:

- proper books of account have been kept by the Company and the Group, sufficient to enable financial statements to be prepared, so far as it appears from our examination of those books;
- to the best of our knowledge and according to the information and explanations given to us the financial statements give the information required by the *Companies Act 2015*, in the manner so required.

KPMG.

^{*} The results of these subsidiaries have been consolidated in the carrying value of FHL Retailing Pte Limited, South Sea Cruises Pte Limited and FHL Media Pte Limited respectively

¹ Fair value is based on the future maintainable earnings approach. Movement in fair value is due to an increase or decrease in future maintainable earnings which is based on forecasted results for the respective entities.

² These entities primarily hold investments in listed equity securities. Fair value is based on the net tangible asset approach with investments in listed equity securities being measured at fair value based on the quoted share price at reporting date.

³ Fair value is based on the net tangible asset approach. For FHL Properties Pte Limited the fair value primarily represents the value of the underlying investment properties which was independently valued at year end.

⁴ Fair value is based on the future maintainable dividends approach. Movement in fair value is due to an increased volatility in capital markets.

⁵ Fair value is based on recent acquisition price.

2. General information

Fijian Holdings Limited ("the Company") is incorporated and domiciled in Fiji and its registered office and principal place of business is located at 7th Floor, Ra Marama House, 91 Gordon Street, Suva, Fiji.

The consolidated financial statements of the Company as at and for the year ended 30 June 2025 comprise the Company and its subsidiaries (together referred to as "the Group" and individually as "group entities") and the group's interest in associates. The Company and its subsidiaries are incorporated and domiciled in Fiji and Papua New Guinea.

The principal activity of the Company is investment. The principal activities of the Group are the production and sale of cement, concrete and concrete products, investment and rental of property, fund management, stock broking, asset and loan financing and acceptance of term deposits, provision of sea transportation services and boat charters, cruise ship operations, commercial free to air television broadcasting services, selling and servicing of radio, television and communications, retailing and wholesaling of general merchandise, and owners and administrators of properties. The Company is listed on the South Pacific Stock Exchange.

These financial statements were authorised for issue by the Board of Directors on ________ September 2025.

2.1. Statement of Compliance

These financial statements are general purpose financial statements which have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the International Accounting Standards Board and the requirements of Companies Act 2015.

2.2 Basis of accounting

These financial statements have been prepared under the historical cost basis, except for the following items, which are measured on an alternative basis at each reporting date.

ItemsMeasurement basesEquity securitiesFair valueInvestment propertiesFair valueIsland propertiesFair value

Standards, amendments and interpretations issued but not yet effective

A number of new and amended standards are effective for annual periods beginning after 1 July 2024 and earlier application is permitted; however, the Group has not early adopted the following new or amended accounting standards in preparing these financial statements.

- IFRS 18 Presentation and Disclosure in Financial Statements

The following new and amended accounting standards are not expected to have a significant impact on the Group's financial statements

- Lack Exchangeability (Amendments to IAS21)
- Classifications and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7)

2.3 Use of estimates and judgments

The preparation of the financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. Information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in the following notes:

Note 3.4 – determining the fair value of equity securities

Note 3.4.6 - measurement of ECL allowance for loans, advances and receivables

Note 3.6 – determining the fair value of investment properties

Note 3.10 – impairment test of non-financial assets

Note 3.13 – recognition of deferred tax assets

Note 3.18 – recognition and measurement of provisions

2.4 Functional and presentation currency

Items included in the financial statements of each of the group entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Fiji Dollars, which is the Group's functional and presentation currency.

2.5 Liquidity presentation of the statement of financial position

In accordance with IAS 1 Presentation of Financial Statements (paras. 60–62), the Group presents its statement of financial position on a liquidity basis, rather than using a current/non-current classification. Management considers this presentation to provide information that is more reliable and more relevant to users because the Group includes Merchant Finance Pte Limited, a licensed financial institution, whose assets and liabilities are primarily financial in nature and are managed on a net liquidity/maturity basis.

Under this approach, assets and liabilities are presented in order of liquidity. Where relevant, the Group discloses in the notes the amounts expected to be recovered or settled within 12 months and after 12 months, and provides contractual maturity analyses for financial instruments in the liquidity risk disclosures (per IFRS 7).

3. Summary of Material Accounting Policies

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented.

3.1 Principles of consolidation

i. Business combinations

The Group accounts for business combinations using the acquisition method when the acquired set of activities and assets meets the definition of a business and control is transferred to the Group (see 3.1(ii)). In determining whether a particular set of activities and assets is a business, the Group assesses whether the set of assets and activities acquired includes, at a minimum, an input and substantive process and whether the acquired set has the ability to produce outputs.

The Group has an option to apply a 'concentration test' that permits a simplified assessment of whether an acquired set of activities and assets is not a business. The optional concentration test is met if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets.

The consideration transferred in the acquisition is generally measured at fair value, as are the identifiable net assets acquired. Any goodwill that arises is tested annually for impairment (see 3.10). Any gain on a bargain purchase is recognised in the profit or loss immediately. Transaction costs are expensed as incurred, except if related to the issue of debt or equity securities.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in profit or loss.

Any contingent consideration is measured at fair value at the date of acquisition. If an obligation to pay contingent consideration that meets the definition of a financial instrument is classified as equity, then it is not remeasured and settlement is accounted for within equity. Otherwise, other contingent consideration is remeasured at fair value at each reporting date and subsequent changes in the fair value of the contingent consideration are recognised in profit or loss.

If share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards), then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based measure of the replacement awards compared with the market-based measure of the acquiree's awards and the extent to which the replacement awards relate to pre-combination service.

ii. Subsidiaries

Subsidiaries are all those entities over which the Group has control. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

iii. Non-controlling interest

The Group measures any non-controlling interest at its proportionate interest in the identifiable net assets of the acquiree at the date of acquisition. Changes in the Group's interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

iv. Loss of control

When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

v. Transactions eliminated on consolidation

Intra-group transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses on these transactions are also eliminated. Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

3. Summary of Material Accounting Policies (continued)

3.1 Principles of consolidation (continued)

vi. Interests in equity accounted investees

Associates are those entities over which the Group has significant influence but not control over the financial and operating policies. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost which includes transaction costs

The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in reserves is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Dilution gains and losses arising on investments in associates are recognised in profit or loss.

3.2 Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisitions, are translated to the functional currency at exchange rates at the reporting date. The income and expenses of foreign operations are translated to Fijian dollars at exchange rates at the dates of the transactions. Foreign currency differences are recognised in other comprehensive income and presented in the foreign currency translation reserve in equity. If the foreign operation is a non-wholly-owned subsidiary, then the relevant proportion of the translation difference is allocated to the NCI.

When a foreign operation is disposed of in its entirety or partially, such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to the foreign operation is reclassified to profit or loss as part of the gain or loss on disposal. If the Group disposes part of its interest in a subsidiary but retains control, then the relevant proportion of the cumulative amount is reattributed to NCI. When the Group disposes only part of an associate or joint venture while retaining significant influence or joint control the relevant proportion of the cumulative amount is reclassified to profit or loss.

3.3 Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with maturities of three months or less from the acquisition date. For the purposes of the statement of cash flows, cash and cash equivalents comprise cash on hand, deposits held at call with banks and bank overdrafts. Bank overdrafts are included within borrowings in liabilities on the statement of financial position.

3.4 Financial instruments

3.4.1 Recognition and initial measurement

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company and the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

3.4.2 Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company and the Group changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

- 3. Summary of Material Accounting Policies (continued)
- 3.4 Financial instruments (continued)

3.4.2 Classification and subsequent measurement (continued)

Financial assets (continued)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company and the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets: Business model assessment

The Company and the Group makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company and the Group's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company and the Group's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

3. Summary of Material Accounting Policies (continued)

3.4 Financial instruments (continued)

3.4.2 Classification and subsequent measurement (continued)

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest (continued)

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company and the Group considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company and the Group considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable rate features;
- prepayment and extension features; and
- terms that limit the Company and the Group's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract.

Financial assets: Subsequent measurement and gains and losses

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Debt investments at FVOCI

These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVOCI

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Financial liabilities: Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

3.4.3 Derecognition

Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company and the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset. The Company and the Group enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognised.

3. Summary of Material Accounting Policies (continued)

3.4 Financial instruments (continued)

3.4.3 Derecognition (continued)

Financial liabilities

The Company and the Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company and the Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

3.4.4 Modifications of financial assets

If the terms of a financial asset are modified, the Company and the Group evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised (see (3.4.3)) and a new financial asset is recognised at fair value.

If the cash flows of the modified asset carried at amortised cost are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Company and the Group recalculates the gross carrying amount of the financial asset and recognises the amount arising from adjusting the gross carrying amount as a modification gain or loss in profit or loss. If such a modification is carried out because of financial difficulties of the borrower (see (3.4.6)), then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income (see (3.22)).

3.4.5 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company and the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

3.4.6 Impairment

Financial instruments

The Company and the Group recognises loss allowances for expected credit losses (ECLs) on financial assets measured at amortised cost, contract assets and loan commitments issued.

No impairment loss is recognised on equity investments.

The Company and the Group measures loss allowances at an amount equal to lifetime ECL, except for the following, which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECL.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company and the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company and the Group's historical experience and informed credit assessment and including forward-looking information.

The Company and the Group assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Company and the Group considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Company and the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

3. Summary of Material Accounting Policies (continued)

3.4 Financial instruments (continued)

3.4.6 Impairment (continued)

The Company and the Group considers a debt security to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'. The Company and the Group considers this to be Baa3 or higher per rating agency Moody's or BBB- or higher per rating agency Standards & Poor's.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company and the Group is exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. They are measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company and the Group expects to receive);
- financial assets that are credit-impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows; and
- undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Group if the commitment is drawn down and the cash flows that the Company and the Group expects to receive.

ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Company and the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company and the Group on terms that the Company and the Group would not consider otherwise:
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

- financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets;
- loan commitments: generally, as a provision;
- where a financial instrument includes both a drawn and an undrawn component, and the Company and the Group cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Group presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision; and
- debt instruments measured at FVOCI: no loss allowance is recognised in the statement of financial position because the carrying amount of these assets is their fair value. However, the loss allowance is charged to profit or loss and is recognised in OCI.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company and the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company and the Group's procedures for recovery of amounts due.

3. Summary of Material Accounting Policies (continued)

3.5 Property, plant and equipment

(i) Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses except for island properties which are shown at fair value.

Freehold land is shown at cost and improvements are shown at cost less accumulated depreciation. Island properties are shown at fair value based on valuations by external independent valuers. All other items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

The value of property, plant and equipment recognised as a result of a business combination is the estimated amount for which a property could be exchanged on the date of acquisition between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably.

Subsequent to initial recognition, increases in the carrying amount arising on revaluation of island properties are credited to other comprehensive income and recorded as revaluation reserve in shareholders' equity. Decreases that off-set previous increases of the same asset are charged against other comprehensive income and revaluation reserves in equity, all other decreases are charged as an expense in profit or loss.

Gains and losses on disposal of property, plant and equipment are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (refer note 3.10).

(ii) Subsequent expenditure

Expenditure incurred to replace a component of an item of property, plant and equipment that is accounted for separately, including major improvements, renovations and overhaul expenditure, is capitalised. Other subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the item of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are expensed in profit or loss during the financial period in which they are incurred.

(iii) Depreciation and amortisation

Freehold land and island properties are not depreciated. Leasehold properties, plant and equipment and other assets are depreciated and amortised on the straight line basis over their estimated useful lives, using the following depreciation rates:

	<u>Rate</u>
Leasehold land and improvements	Term of lease
Buildings	1.25% - 10%
Plant and equipment:	
- machinery, furniture & fittings and office equipment	2.50% - 40%
- motor vehicles	15% - 33%
- vessels	3% - 33%
Software	20%

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted as appropriate.

(iv) Reclassification to investment property

When the use of a property changes from owner-occupied to investment property, the property is remeasured to fair value and reclassified accordingly. Any gain arising on this remeasurement is recognised in profit or loss to the extent that it reverses a previous impairment loss on a specific property, with any remaining gain recognised in OCI and presented in the revaluation reserve. Any loss is recognised in profit or loss. However, to the extent that an amount is included in the revaluation surplus for that property, the loss is recognised in other comprehensive income and reduces the revaluation surplus within equity.

3. Summary of Material Accounting Policies (continued)

3.6 Investment properties

Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in profit or loss. Rental income from investment property is accounted for as described in accounting policy 3.16.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss. When an investment property that was previously classified as property, plant and equipment is sold, any related amount included in the revaluation reserve (see note 3.5(iv)) is transferred to retained earnings.

3.7 Assets held for sale and discontinued operations

Non-current assets (or disposal groups comprising assets and liabilities) are classified as held-for-sale if it is highly probable that their value will be recovered primarily through sale rather than through continuing use. Assets classified as held for sale are stated at the lower of their carrying amount and fair value less costs to sell and are no longer amortised or depreciated.

A discontinued operation is a component of the Group's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group and which:

- represents a separate major line of business or geographical area of operations;
- is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or
- is a subsidiary acquired exclusively with a view to re-sale.

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held-for-sale.

When an operation is classified as discontinued operations, the statement of profit or loss and other comprehensive income is represented as if the operations had been discontinued from the start of the comparative year.

3.8 Inventories

Inventories are stated at lower of cost and net realisable value. The cost of raw materials, stores and supplies includes all costs of acquisition, calculated on the first-in-first-out or weighted average cost basis. Finished goods and work in process are valued at actual cost of conversion, including a proportion of fixed and variable factory overheads, or standard cost, including an appropriate share of production overheads based on normal operating capacity. Net realisable value is the estimated selling price in the ordinary course of business less applicable variable selling expenses. Inventory obsolescence is considered as part of determining the net realisable value, based on reviews of inventories.

3.9 Intangible assets

(a) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill on acquisition of subsidiaries is included in intangible assets. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed.

The gain or loss on disposal of an entity includes the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified according to operating segment.

(b) Management rights

Management rights represent the initial cost paid in acquiring the rights and interest in the Management Agreement between RB Patel Group Limited (a subsidiary of FHL Retailing Pte Limited) and RB Patel & Co., a New Zealand partnership. Management rights are carried at cost less accumulated amortisation (based on the contract period of the management right) and impairment losses. Amortisation is charged on a straight line basis over the period of the management agreement.

3. Summary of Material Accounting Policies (continued)

3.10 Impairment of non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than investment property, inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.11 Trade and other creditors

Trade and other creditors are stated at amortised cost. These amounts represent liabilities for goods and services provided to the Company and the Group prior to the end of the financial year and which are unpaid.

3.12 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

3.13 Current and deferred income tax

Income tax comprises of current tax and deferred tax. It is recognised in profit or loss unless it relates to a business combination, or items recognised directly in equity or in OCI.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date in the respective countries, where the Company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences only to the extent that it is probable that future taxable profit will be available against which the deferred tax assets can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

3. Summary of Material Accounting Policies (continued)

3.13 Current and deferred income tax (continued)

Deferred tax is not recognised for taxable temporary differences arising on the initial recognition of goodwill.

3.14 Employee entitlements

Liabilities for annual leave are recognised in respect of employees' services up to the reporting date and are measured at the amounts expected to be paid when the liabilities are settled.

A liability for long service leave is recognised as the present value of estimated future cash outflows to be made in respect of services provided by employees up to the reporting date. The estimated future cash outflows are discounted using interest rates on government bonds which have terms to maturity that match, as closely as possible, the estimated future cash outflows. Factors which affect the estimated cash outflows, such as expected future salary increases, experience of employee departures and period of service, are incorporated in the measurement.

Obligations for contributions to defined contribution pension plans are recognised as an expense in profit or loss when they are incurred.

3.15 Leases

At inception of a contract, the Company and the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company and the Group assesses whether:

- the contract involves the use of an identified asset this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;
- the Company and the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company and the Group has the right to direct the use of the asset. The Company and the Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company and the Group has the right to direct the use of the asset if either:
 - the Company and the Group has the right to operate the asset; or
 - the Company and the Group designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Company and the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

(i) As a lessee

The Company and the Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company and the Group's incremental borrowing rate. Generally, the Company and the Group uses its incremental borrowing rate as the discount rate.

3. Summary of Material Accounting Policies (continued)

3.15 Leases (continued)

(i) As a lessee (continued)

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date; and
- the exercise price under a purchase option that the Company and the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Company and the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company and the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company and the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company and the Group presents right-of-use assets and lease liabilities as separate line items in the statement of financial position (see note 9).

Short-term leases and leases of low-value assets

The Company and the Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of space that have a lease term of 12 months or less and leases of low-value assets. The Company and the Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(ii) As a lessor

When the Company and the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company and the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Company and the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Company and the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Company and the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Company and the Group applies IFRS 15 to allocate the consideration in the contract. The Company and the Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of 'other income'.

3.16 Revenue recognition

a. Material accounting policy

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The Company and the Group recognises revenue when it transfers control over a product or service to a customer.

No information is provided about remaining performance obligations at year end that have an original expected duration of one year or less or where the Group recognises revenue based on the amount it has a right to invoice, as allowed by IFRS 15. The Group recognises the incremental costs of obtaining contracts as an expense when incurred if the amortisation period of the assets that the Group otherwise would have recognised is one year or less, as allowed by IFRS 15.

b. Nature of goods and services

The following is a description of the principal activities – separated by reportable segments – from which the Company and the Group generates its revenue. For more detailed information about reportable segments, see Note 35.

3. Summary of Material Accounting Policies (continued)

3.16 Revenue recognition (continued)

b. Nature of goods and services (continued)

i. Construction

a) Sale of goods and services

The construction segment of the Group manufactures and sells cement, ready-mix concrete, concrete blocks, pavers, aggregates, concrete pipes, beams, power poles, other pre-stressed concrete products, tile adhesives and services as customs clearing agents. The segment recognises revenue when the customer takes possession of the good, when the goods leave the factory premises having been shipped to the customer or when the customer receives the service. Invoices are generated at that point in time. Invoices are usually payable within 30 days. For customers that prepay, the amount received is recognised as a contract liability and revenue is recognised as the segment satisfies its respective performance obligation for the product or service. There is no significant financing component in respect of contract liabilities.

b) Construction services

The construction segment includes the design and building of ready-made homes. The segment enters into individual contracts with each of its customers. Construction of a dwelling is deemed to represent a single performance obligation to the customer, which is a performance obligation satisfied over time. The performance obligation is satisfied progressively over the construction period, with performance being measured by reference to regular engineer's reports (which represents an output method for measuring progress). The customer controls the asset as it is being created and the segment's service is being performed. Depiction of the transfer or the control of the goods or service to the customer is recognised using the output method. Invoices are issued according to contractual terms and are usually payable within 30 days. Uninvoiced amounts are presented as contract assets.

ii. Property

The property segment of the Group generates revenue from rental of investment properties and recognises rental income in accordance with note 3.15(ii).

iii. Finance

The finance segment of the Group generates interest from loans and advances to customers and recognises interest income in accordance with note 3.22.

iv. Tourism

The tourism segment of the Group principally generates revenue from providing island resort connections in the Mamanucas and Yasawas, island day cruises, holiday packaging in the Yasawa Islands, cruises to the Yasawa Islands, vessel hires and charters, and sale of food and beverage items. Customers typically prepay and the amount received is recognised as a contract liability and revenue is recognised as the segment satisfies the respective performance obligation for the product or service. There is no significant financing component in respect of contract liabilities.

- 3. Summary of Material Accounting Policies (continued)
- 3.16 Revenue recognition (continued)
- b. Nature of goods and services (continued)
- iv. Tourism (continued)

Products and services	Nature, timing of satisfaction of performance obligations and significant payment terms
Island resort connections in the Mamanucas and Yasawas	An island resort connection involves transferring a customer from Port Denarau Marina to an island resort or vice versa or within island resorts on board the vessels. The transfer can be a one way
	transfer or a return transfer. The Group recognises revenue as the service of the transfer is provided.
Island day cruises	The Group provides half and full day adventures to various island resorts which are owned and managed by third parties and also to islands which are owned and managed by the Group. An island day cruise package to an island resort includes boat transfers, utilisation of facilities at the island resorts and meals. The package is accounted for as a single performance obligation, as the Group provides a significant service of integrating the various services into a combined output. Revenue from island day cruises is recognised as the service is provided.
Holiday packaging in the Yasawa Islands	The Group provides holiday packages to its guests which includes Island Resort accommodations which are owned and managed by third parties and return transfers to the Island Resorts in the Yasawa Islands. The package is accounted for as a single performance obligation, as the Group provides a significant service of integrating the various services into a combined output. Revenue from holiday packages in the Yasawas is recognised when the guest departs for the package which is the point when the Group has satisfied its performance obligations. Under this arrangement the Group has been assessed to be the principal.
Cruise to the Yasawa Islands	This is a cruise on board the vessel, Fiji Princess. There are three types of cruise offered based on the number of nights being 3 nights, 4 nights and 7 nights' cruise in the Yasawa Islands. Revenue from cruise is recognised when the cruise night has elapsed.
Vessel hires and charters	The Group provides its vessels for hires and charters where revenue is based on a fixed rate per trip made. Revenue is recognised when the service has been rendered.
Sale of food and beverage items	Sale of food and beverage items occurs on board the vessels and on the islands which the Group manages and owns. Revenue is recognised at the point of sale.

v. Media

The media segment of the Group generates revenue from the operation of commercial free to air broadcasting services and the selling and servicing of radio, television and communications products and multiplex cinemas. Revenue is recognised based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control over a product or service to a customer.

Products and services	Nature, timing of satisfaction of performance obligations and significant payment terms
Sale of communication equipment	The Group supplies communication equipment to customers. The equipment to be supplied together with the quantity, prices and payment terms are governed by a contract and are not subject to change during the duration of the contract. The Group purchases communication equipment when ordered by the customer and delivers the equipment to the customer as and when they arrive. The contract states the specific price for each piece of equipment ordered and there is a breakdown of the amount for each equipment. Revenue is recognised as and when the equipment gets delivered to the customer.
Advertising	Advertising is based on the purchase orders received from the customers. Advertising slots have various prices based on the length and timing of the advertisement. The advertising schedule is agreed with the customer and entered into the system. Invoices are raised at month end and only includes the revenue for the advertisements that were aired during the month. Invoices are usually payable within 30 days.
Sponsorship	Sponsorship is based on purchase orders received from the customers. The value of the purchase order is divided by the number of sponsored program episodes to determine the amount of revenue per episode. Invoice is raised at month end and only includes the revenue for the number of sponsored episodes that were aired during the month. Invoices are usually payable within 30 days.

3. Summary of Material Accounting Policies (continued)

3.16 Revenue recognition (continued)

Nature of goods and services (continued)

vi. Retail

The retail segment of the Group generates revenue from the retailing and wholesaling of general merchandise. Revenue is recognised at a point in time when possession of the goods has transferred to the customer. This is generally when the goods are delivered to the customer. However, for export sales, control might also be transferred when delivered either to the port of departure or port of arrival, depending on the specific terms of the contract with a customer. There is limited judgement needed in identifying the point control passes: once physical delivery of the products to the agreed location has occurred, the Group no longer has physical possession, usually will have a present right to payment (as a single payment on delivery) and retains none of the significant risks and rewards of the goods in question.

vii. Investment

The investment segment of the Group generates revenue from equity investments in the form of dividends and management fees. Dividend income is recognised in accordance with note 3.4. Management fees is recognised over time as services are rendered to group entities.

3.17 Dividend distribution

Provision is made for the amount of any dividend declared, determined or publicly recommended by the directors on or before the end of the financial year but not distributed at balance date. Dividends are subject to the provisions of the Fiji Income Tax Act and Income Tax (Dividend) Regulations 2001.

3.18 Provisions

Provisions are recognised when the Company and the Group has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated.

3.19 Basic and diluted earnings per share

Basic and diluted earnings per share is determined by dividing profit after income tax attributable to shareholders of the Company by the weighted average number of ordinary shares outstanding during the financial year. If the number of ordinary shares outstanding increases as a result of a capitalisation, bonus issue or share split, or decreases as a result of a reverse share split, the calculation of basic and diluted earnings per share for all periods presented is adjusted retrospectively.

3.20 Rounding

All amounts have been rounded to the nearest thousand dollars except where otherwise noted.

3.21 Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

3.22 Finance income and finance costs

The Company and the Group's finance income and finance costs include:

- interest income:
- interest expense;
- the foreign currency gain or loss on financial assets and financial liabilities; and
- Impairment losses (and reversals) on investments in debt securities carried at amortised cost.

Interest income or expense is recognised using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

3. Summary of Material Accounting Policies (continued)

3.22 Finance income and finance costs (continued)

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

3.23 Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company and the Group has access at that date. The fair value of a liability reflects its non-performance risk. A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

When one is available, the Company and the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Company and the Group uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction. If an asset or a liability measured at fair value has a bid price and an ask price, then the Company and the Group measures assets and long positions at a bid price and liabilities and short positions at an ask price.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price – i.e. the fair value of the consideration given or received. If the Company and the Group determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

3.24 Contract liabilities

Contract liabilities arise where a customer has paid an amount of consideration prior to the Group performing by transferring the related good or service to the customer. Generally, the contract liability balance at the beginning of the period will be recognised as revenue during the year. The yearend contract liability balance represents advanced consideration received from customers. Revenue is recognised once the related service has been provided or possession of the goods has transferred to the customer.

4. Asset held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held-for-sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use. Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to financial assets, deferred tax assets or investment property assets, which continue to be measured in accordance with the Company's other accounting policies. Impairment losses on initial classification as held-for-sale and subsequent gains and losses on remeasurement are recognised in profit or loss. Once classified, assets held for sale are stated at the lower of the carrying amount and fair value less costs to sell. Gains and losses on disposals are determined by comparing proceeds with the carrying amounts.

5. FINANCIAL RISK MANAGEMENT

5.1 Risk Management Framework

The Board of Directors has overall responsibility for the establishment and oversight of the Company and the Group's risk management framework. The Board has established the Audit and Risk Sub-Committee, which is responsible for developing and monitoring the Company and the Group's risk management policies. The committee reports regularly to the Board of Directors on its activities.

The Company and the Group's risk management policies are established to identify and analyse the risks faced by the Company and the Group, to set appropriate risk limits and control, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company and the Group's activities. The Company and the Group, through its training and management standards and procedures, aim to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

Risk management is also carried out by Group Audit, Risk and Compliance department. The GARC monitors compliance with the Group's risk management policies and framework in relation to risks faced by each company in the Group. The GM ARC who is also part of the Audit and Risk Sub-Committee, is responsible for monitoring compliance with Group risk management policies and procedures and for reviewing the risk management framework in relation to the risks faced by the Group. The Group Management team is assisted in these functions by an Internal Audit function which undertakes both regular and ad-hoc reviews of management controls and procedures, the results of which are reported directly to the Audit and Risk Sub-Committee of the Board.

(a) Market Risk

Market risk is the risk that changes in market prices, such as interest rate, equity prices, foreign exchange rates and credit spreads will affect the Company and the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to control market risk exposures within acceptable parameters while optimising the return on risk.

Unfavourable changes to duty and tax regulations may expose the Company and the Group to a decline in revenue. To minimise this risk, the Company and the Group implements appropriate strategies to ensure that products and prices remain attractive. The Company and the Group operates predominantly in Fiji, and changes to governments and the policies they implement affect the economic situation and ultimately the revenues of the Company and the Group. To address this, the Company and the Group reviews its pricing and product range regularly and tries to respond appropriately to these changes. Other developments such as international travel restrictions resulting from the COVID-19 pandemic may also expose the Group to reduced revenue. To address this, the Company and the Group monitors developments and responds quickly to fluid developments.

(i) Foreign exchange risk

The Company and the Group undertakes certain transactions denominated in foreign currencies hence exposures to exchange rate fluctuations arise. Exchange rate exposures are closely managed within approved policy parameters. Major foreign exchange transactions relate to importation of goods and services with settlement based on spot rates. Foreign currency risk arises from recognised assets and liabilities that are denominated in a currency that is not the Group's functional currency (refer notes 2.4 and 3.21).

The Group procures goods, assets, raw materials and supplies from principal suppliers based predominantly in New Zealand, Australia and Japan. As a measure, prompt settlement of liabilities (and assets if necessary) is exercised by management to minimise the exposure to foreign exchange losses. As an additional measure, the Group negotiates competitive rates with its bankers to minimise losses and maximise gains when foreign exchange receipts and payments become due. The Group's exposure to foreign exchange risk is not material.

(ii) Price risk

The Group is exposed to equity securities price risk because of investments held by the Company and the Group and classified on the statements of financial position as FVOCI. To manage its price risk arising from investment in equity securities, the Company and the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group. The Group's equity investments in other entities that are publicly traded are quoted on the South Pacific Stock Exchange.

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

- (a) Market Risk (continued)
- (ii) Price risk (continued)

Sensitivity analysis

The table below sets out the effect on equity of a reasonably possible increase in the individual equity market prices of listed equities of 5% at 30 June 2025 and 2024. The estimates are made on an individual investment basis. The analysis assumes that all other variables, in particular interest and foreign currency rates, remain constant.

	Group		Compa	Company	
	2025	2024	2025	2024	
	\$'000	\$'000	\$'000	\$'000	
Impact on equity	1,160	1,086	13,679	15,404	

An equal change in the opposite direction would have decreased equity by the same amount.

(iii) Interest rate risk

The principal risk to which investments and lending portfolios are exposed, is the risk of loss from fluctuations in future cash flows or fair values of financial instruments because of a change in market interest rates. Interest rate risk is managed principally through monitoring interest rate gaps and by having pre-approved limits for re-priced bonds.

In one of the Group's subsidiaries; Merchant Finance Pte Limited (MFL), the management of interest rate risk against interest rate gap limits is supplemented by management's regular monitoring of the sensitivity of MFL financial assets and liabilities to various standard interest scenarios and market offerings.

Interest rate risk is managed through: 1) investments; 2) loan pricing; and 3) deposit pricing. MFL tries to maintain an interest spread that it believes is sufficient to cater for the risk it is taking and is above the cost of its funds and is sufficient to cover operating costs. Interest spread is monitored monthly and is submitted to the Reserve Bank of Fiji (RBF) for monitoring purposes.

The carrying amounts of the Company and Group's interest bearing financial instruments are set out below:

	Group		Company	
	2025	2024	2025	2024
Financial instrument	\$'000	\$'000	\$'000	\$'000
Financial assets				
Deposits with financial institutions	3,890	8,888	-	-
Government securities	800	800	-	-
Cash and cash equivalents	69,701	32,253	3,332	5,119
Loans and advances	221,491	161,057	23,299	23,110
	295,882	202,998	26,631	28,229
Financial liabilities				_
Bank overdraft	11,720	8,247	-	-
Bank loans	197,536	158,212	85,583	61,471
Fixed term deposits and short term borrowings (unsecured)	186,655	118,747	-	1,002
_	395,911	285,206	85,583	62,473

At the reporting date the profile of the Company and the Group's variable interest bearing financial instruments was as follows:

	Group		Company	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Bank overdraft	11,720	8,247	-	-
Bank loans	197,536	158,212	85,583	61,471
	209,256	166,459	85,583	61,471

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

- (a) Market Risk (continued)
- (iii) Interest rate risk (continued)

Sensitivity analysis

A 100 basis points (bp) increase in interest rates at the reporting date would have decreased equity and the profit or loss by amounts shown below. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2024.

	Grou	Group		Company	
	Equity	Profit or loss before tax	Equity	Profit or loss before tax	
	\$'000	\$'000	\$'000	\$'000	
30 June 2025 Variable rate instruments	2,093	2,093	856	856	
30 June 2024 Variable rate instruments	1,665	1,665	615	615	

There are no uncertainties related to interest rate cash flows during the period of borrowing for those financial instruments which are at fixed interest. The interest rate for financial instruments at fixed interest ranges from 0.40% to 7.25% (2024: 1.55% to 7.25%)

(b) Credit risk

Credit risk is the risk of financial loss to the Company and the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company and the Group's receivables and loans and advances to customers and investments in debt securities.

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, including outstanding receivables and committed transactions. For potential rental tenants, a screening process, similar to a due diligence is performed, prior to leases being granted. For banks and financial institutions, only reputable parties are acceptable. As far as practicable, if wholesale customers are independently rated, these ratings are used. Otherwise, if there is no independent ranking, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with set limits. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards.

The carrying amounts of financial assets represent the maximum credit exposure.

Impairment losses on financial assets recognised in profit or loss were as follows.

	Group	
	2025	2024
	\$'000	\$'000
Impairment loss on loans, advances and receivables (reversed)/recognised	(304)	(1,201)

Expected credit loss assessment for trade receivables

The Group uses an allowance matrix to measure the ECLs of trade receivables from individual customers, which comprise a large number of small balances.

Loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off.

The following table provides information about the exposure to credit risk and ECLs for trade receivables excluding other receivables from individual customers as at 30 June 2024 and 2025:

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

(b) Credit risk (continued)

Expected credit loss assessment for trade receivables (continued)

	Gross carrying		
	amount	Loss allowance	Credit impaired
	\$'000	\$'000	
30 June 2025			
Current (not past due)	7,739	(99)	No
1 – 30 days past due	2,035	(51)	No
31 – 60 days past due	923	(96)	No
61 – 90 days past due	458	(118)	No
Over 90 days past due	1,501	(301)	Yes
Debts individually assessed	2,707	(2,466)	Yes
	15,363	(3,131)	
30 June 2024			
Current (not past due)	9,926	(143)	No
1 – 30 days past due	4,234	(119)	No
31 – 60 days past due	800	(53)	No
61 – 90 days past due	253	(37)	No
Over 90 days past due	963	(146)	Yes
Debts individually assessed	4,444	(2,560)	Yes
	20,620	(3,058)	

Loss rates are based on actual credit loss experience over the past two years. These rates are multiplied by scalar factors to reflect differences between economic conditions during the period over which the historic data has been collected, current conditions and the Group's view of economic conditions over the expected lives of the receivables. Scalar factors are either based on actual and forecast GDP or inflation rates.

Movements in the allowance for impairment in respect of trade receivables

The movement in the allowance for impairment in respect of trade receivables during the year is disclosed in note 13.

Cash and cash equivalents

The Group held cash and cash equivalents of \$69.701 million at 30 June 2025 (2024: \$32.253 million). The Company held cash and cash equivalents of \$3.332 million at 30 June 2025 (2024: \$5.119 million). The cash and cash equivalents are held with banks, which are rated B- to AA-, based on Standards and Poor's (S&P) ratings.

Impairment on cash and cash equivalents has been measured on the 12 month expected loss basis and reflects the short maturities of the exposures. The Company and the Group uses a similar approach for assessment of ECLs for cash and cash equivalents to those used for debt securities.

The Company and the Group did not recognise an impairment allowance against cash and cash equivalents as at 30 June 2025 (2024: nil).

Debt investment securities

The Group held debt investment securities of \$4,690,000 at 30 June 2025 (2024: \$9,688,000). The debt investment securities are held with banks, credit institutions and the Fiji Government. Debt investment securities held with banks and the Fiji Government are rated B-to AA-, based on S&P ratings. In relation to debt investment securities held with credit institutions the Group monitors changes in credit risk by reviewing available press and regulatory information.

Impairment on debt investment securities held with banks and credit institutions has been measured on the 12 month expected loss basis and reflects the short maturities of the exposures. Impairment on debt investment securities held with the Fiji Government has been measured on the 12 month expected loss basis.

The Group did not recognise an impairment allowance against debt investment securities as at 30 June 2025 (2024: nil).

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

(b) Credit risk (continued)

Details relating to MFL are set out below:

Details relating to loans and advances for Merchant Finance Pte Limited ("MFL") are set out below:

Amounts arising from ECL

Inputs, assumptions and techniques used for estimating impairment.

See accounting policy in Note 3.4.6.

Significant increase in credit risk

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, MFL considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on MFL's historical experience and expert credit assessment and including forward-looking information.

The objective of the assessment is to identify whether a significant increase in credit risk has occurred for an exposure by comparing:

- the remaining lifetime probability of default (PD) as at the reporting date; with
- the remaining lifetime PD for this point in time that was estimated at the time of initial recognition of the exposure (adjusted where relevant for changes in prepayment expectations).

Credit risk grades

MFL allocates each exposure to a credit risk grade based on certain data that is determined to be predictive of the risk of default and applying experienced credit judgement. Credit risk grades are defined using qualitative and quantitative factors that are indicative of risk of default. These factors vary depending on the nature of the exposure and the type of borrower.

Credit risk grades are defined and calibrated such that the risk of default occurring increases exponentially as the credit risk deteriorates so, for example, the difference in risk of default between credit risk grades standard and special mention is smaller than the difference between credit risk grades special mention, substandard, doubtful and loss.

Customer accounts are graded internally and all existing customers are categorised as excellent, good, satisfactory or limited. Further the individual accounts/customer groups are classified as Standard, Special Mention, Sub Standard, Doubtful and Loss for credit risk management purposes.

Each exposure is allocated to a credit risk grade at initial recognition based on available information about the borrower. Exposures are subject to ongoing monitoring, which may result in an exposure being moved to a different credit risk grade. The monitoring typically involves use of the following data.

- Information obtained during periodic review of customer files e.g. audited financial statements, management accounts, budgets and projections. Examples of areas of particular focus are: gross profit margins, financial leverage ratios, debt service coverage and compliance with covenants;
- Payment record this includes overdue status as well as a range of variables about payment ratios;
- · Utilisation of the granted limit;
- · Requests for and granting of forbearance; and
- Existing and forecast changes in business, financial and economic conditions.

Generating the term structure of PD

Credit risk grades are a primary input into the determination of the term structure of PD for exposures. MFL collects performance and default information about its credit risk exposures analysed by type of product and borrower as well as by credit risk grading.

MFL employs statistical models to analyse the data collected and generate estimates of the remaining lifetime PD of exposures and how these are expected to change as a result of the passage of time.

- 5. FINANCIAL RISK MANAGEMENT (continued)
- 5 1 Risk Management Framework (continued)
- (b) Credit risk (continued)

Details relating to MFL are set out below: (continued)

Amounts arising from ECL (continued)

Generating the term structure of PD (continued)

This analysis includes the identification and calibration of relationships between changes in default rates and changes in key macro-economic factors as well as in-depth analysis of the impact of certain other factors (e.g. forbearance experience) on the risk of default. For all exposures, the key macro-economic indicator used is GDP growth, based on publications by the Reserve Bank of Fiji.

Determining whether credit risk has increased significantly

The criteria for determining whether credit risk has increased significantly vary by portfolio and include quantitative changes in PDs and qualitative factors, including a backstop based on delinquency.

The credit risk of a particular exposure is deemed to have increased significantly since initial recognition if, based on MFL's quantitative modelling, the remaining lifetime PD is determined to have increased by more than 30 days past due.

Using its expert credit judgement and, where possible, relevant historical experience, MFL may determine that an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers are indicative of such and whose effect may not otherwise be fully reflected in its quantitative analysis on a timely basis. Renegotiation of loans to customers in financial difficulties is a qualitative indicator of a significant increase in credit risk.

As a backstop, MFL considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

MFL monitors the effectiveness of the criteria used to identify significant increases in credit risk by regular reviews to confirm that:

- the criteria are capable of identifying significant increases in credit risk before an exposure is in default;
- the criteria do not align with the point in time when an asset becomes 30 days past due; and
- there is no unwarranted volatility in loss allowance from transfers between 12-month PD (stage 1) and lifetime PD (stage 2).

Modified financial assets

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan whose terms have been modified may be derecognised and the renegotiated loan recognised as a new loan at fair value in accordance with the accounting policy set out in Note 3.4.4.

MFL renegotiates loans to customers in financial difficulties (referred to as 'forbearance activities') to maximise collection opportunities and minimise the risk of default. Under MFL's forbearance policy, loan forbearance is granted on a selective basis if the debtor is currently in default on its debt or if there is a high risk of default, there is evidence that the debtor made all reasonable efforts to pay under the original contractual terms and the debtor is expected to be able to meet the revised terms.

The revised terms usually include extending the maturity, changing the timing of interest payments and amending the terms of loan covenants. Both personal and motor loans are subject to the forbearance policy. The Audit Committee regularly reviews reports on forbearance activities.

For loans and advances modified as part of MFL's forbearance policy, the estimate of PD reflects whether the modification has improved or restored MFL's ability to collect interest and principal and MFL's previous experience of similar forbearance action. As part of this process, MFL evaluates the borrower's payment performance against the modified contractual terms and considers various behavioural indicators.

Generally, forbearance is a qualitative indicator of a significant increase in credit risk and an expectation of forbearance may constitute evidence that an exposure is credit-impaired (see Note 3.4.6) in default. A customer needs to demonstrate consistently good payment behaviour over a period of time before the exposure is no longer considered to be credit-impaired/in default or the PD is considered to have decreased such that the loss allowance reverts to being measured at an amount equal to 12-month ECL.

5. FINANCIAL RISK MANAGEMENT (continued)

5 1 Risk Management Framework (continued)

(b) Credit risk (continued)

Details relating to MFL are set out below: (continued)

Amounts arising from ECL (continued)

Definition of default

MFL considers loans and advances to be in default when:

- the borrower is unlikely to pay its credit obligations to MFL in full, without recourse by MFL to actions such as realising security (if any is held); or
- the borrower is past due more than 90 days on any material credit obligation to MFL.

In assessing whether a borrower is in default, MFL considers indicators that are:

- qualitative e.g. breaches of covenant;
- quantitative e.g. overdue status and non-payment on another obligation of the same issuer to MFL; and
- based on data developed internally and obtained from external sources.

Inputs into the assessment of whether loans and advances are in default and their significance may vary over time to reflect changes in circumstances.

Incorporation of forward-looking information

MFL incorporates forward-looking information into both its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and its measurement of ECL. Based on advice from the Audit Committee and consideration of a variety of external actual and forecast information. MFL formulates three economic scenarios: a base case, which is the central scenario, and two less likely scenarios, one upside and one downside scenario. The base case represents a most-likely outcome and is aligned with information used by MFL for other purposes such as strategic planning and budgeting. The other scenarios represent more optimistic and more pessimistic outcomes. Periodically, MFL carries out stress testing of more extreme shocks to calibrate its determination of these other representative scenarios. External information includes economic data and forecasts published by Reserve Bank of Fiji.

The scenario probability weightings applied in measuring ECL are as follows:

30 June 2025	Upside	Base	Downside
Scenario probability weighting	20%	55%	25%

MFL has identified and documented key drivers of credit risk and credit losses for each portfolio of loans and advances and, using an analysis of historical data, has estimated relationships between macro-economic variables and credit risk and credit losses. The economic scenarios used as at 30 June 2024 included the following ranges of key indicator for the years ending 30 June 2025, 2025 and 2026.

	2025	2026	2027
GDP growth	3.2%	3.1%	2.9%

Predicted relationship between the key indicator and default and loss rates on loans and advances have been developed based on analysing historical data over the past 5 years.

As at 30 June 2025, MFL continues to apply a post model overlay of 10% (2024: 10%) to accommodate the uncertainty associated with rising inflation, rapid changes to interest rates, geo-political and labour market pressures.

Measurement of ECL

The key inputs into the measurement of ECL are the term structure of the following variables:

- probability of default (PD);
- loss given default (LGD);
- exposure at default (EAD).

These parameters are generally derived from internally developed statistical models and other historical data. They are adjusted to reflect forward-looking information as described above.

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

(b) Credit risk (continued)

Details relating to MFL are set out below: (continued)

Amounts arising from ECL (continued)

Measurement of ECL (continued)

PD estimates are estimates at a certain date, which are calculated based on statistical rating models, and assessed using rating tools tailored to the various categories of counterparties and exposures. These statistical models are based on internally compiled data comprising both quantitative and qualitative factors. Where it is available, market data may also be used to derive the PD for large corporate counterparties. If a counterparty or exposure migrates between rating classes, then this will lead to a change in the estimate of the associated PD. PDs are estimated considering the contractual maturities of exposures and estimated prepayment rates.

LGD is the magnitude of the likely loss if there is a default. MFL estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD model considers the structure, collateral, seniority of the claim and recovery costs of any collateral that is integral to individual loans and advances. LGD estimates are recalibrated for different economic scenarios. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. MFL derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract including amortisation. The EAD of loans and advances is its gross carrying amount. For lending commitments, the EAD includes the amount drawn, as well as potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts.

As described above, and subject to using a maximum of a 12-month PD for loans and advances for which credit risk has not significantly increased, MFL measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for risk management purposes, MFL considers a longer period. The maximum contractual period extends to the date at which MFL has the right to require repayment of an advance or terminate a loan commitment.

Loans and advances are grouped on the basis of shared risk characteristics that include loan purpose and credit risk grading. The groupings are subject to regular review to ensure that exposures within a particular group remain appropriately homogeneous.

Loss allowance

The following tables show reconciliations from the opening to the closing balance of the loss allowance for loans and advances. Explanation of the terms: 12-month ECL, lifetime ECL and credit-impaired are included in Note 3.4.6.

		Lifetime ECL not credit-	Lifetime ECL credit-	
	12-month ECL	impaired	impaired	Total
	\$'000	\$'000	\$'000	\$'000
Loans and advances to				
customers at amortised cost

(b) Credit risk (continued)

Details relating to MFL are set out below: (continued)

Amounts arising from ECL (continued)

Loss allowance (continued)

	12-month ECL	Lifetime ECL Lifetime ECL not credit- credit- th ECL impaired impaired	Total	
	\$'000	\$'000	\$'000	\$'000
Balance at 1 July 2023	756	508	13,749	15,013
Transfer to 12 months ECL	45	(34)	(11)	-
Transfer to lifetime ECL not credit impaired	(136)	144	(8)	-
Transfer to lifetime ECL credit impaired	(659)	(629)	1,288	-
Net remeasurement of loss allowance	611	396	(721)	286
New loans and advances originated or purchased	695	192	321	1,208
Loans and advances that have been derecognised	(167)	(154)	(6,503)	(6,824)
Balance at 30 June 2024	1,145	423	8,115	9,683

The loss allowance in these table includes ECL on loan commitments because MFL cannot separately identify the ECL on the loan commitment component from those on loans and advances.

Credit-impaired loans and advances

See accounting policy in Note 3.4.6.

Credit-impaired loans and advances are graded doubtful to loss in MFL's internal credit risk grading system.

Collateral held and other credit enhancements

MFL holds collateral and other credit enhancements against its credit exposures. The following table sets out the principal types of collateral held against different portfolios of loans and advances.

Percentage of exposure that is subject to collateral requirements

	30 June 2025	30 June 2024	Principal type of collateral
Loans and advances to			
customers			
Motor vehicle	100	100	Motor vehicles
Personal loans	100	100	Property and equipment

As at 30 June 2025, the net carrying amount of credit-impaired loans and advances to customers amounted to \$17.005 million (2024: \$18.062 million) and the value of identifiable collateral (mainly properties and motor vehicles) held against those loans and advances amounted to \$21.828 million (2024: \$29.915 million).

Credit quality analysis

The following table sets out the information about the credit quality of loans and advances. Unless specifically indicated, the amounts in the table represents gross carrying amount.

Explanation of the terms: 12-months ECL, lifetime ECL and credit-impaired are included in Note 3.4.6.

Financial assets under stage 2 are closely monitored to ensure that they do not deteriorate further. Security inspections are undertaken on these accounts to verify the value of the collateral pledged. These assets are monitored by specialist collection teams on a daily basis and further monitored by management at each month end. Where necessary management restructures these loans to enhance recovery.

In order to manage credit risk, MFL closely monitors existing customers in ensuring a debt service ratio greater than 1 and loan to value ratio of 85% is maintained, and ensuring that all new customers go through comprehensive credit screening.

MFL employs a range of policies and practices to mitigate credit risk with the most common practice being the security collateral with guidelines being implemented on the acceptability of specific classes of collateral for credit risk mitigation. The principal collateral types for loans and advances are:

- Mortgages over residential and commercial properties.
- · Hire Purchase Agreements and Bill of Sale over vehicles and machinery
- · Charges over business assets such as premises, inventory and accounts receivable.
- · Charges over financial instruments such as debt securities and equities and term deposits.

Longer-term finance and lending to corporate entities are generally secured. Revolving individual credit facilities for MFL staff to a maximum of \$3,000 are unsecured. In addition, in order to further minimise the potential for credit loss, the MFL will seek additional collateral from the counterparty once impairment indicators are identified for the relevant individual loans and advances.

Collateral held as security for financial assets other than loans and advances depends on the nature of the instrument.

If an account goes into arrears, a credit review is performed and the collateral value is reassessed by the MFL's in-house credit officers or independent valuers for specialised equipment and real-estate.

5. FINANCIAL RISK MANAGEMENT (continued)

5.1 Risk Management Framework (continued)

(b) Credit risk (continued)

Details relating to MFL are set out below: (continued)

Amounts arising from ECL (continued)

Credit risk concentration

Credit risk concentration is determined based on the industry for which the loan is given. An analysis of concentrations of credit risk from loans and advances and loan commitments is shown below:

	Loans and adv	ances
	2025	2024
	(%)	(%)
Industry		
Agriculture	7.15%	8.01%
Building and construction	12.06%	12.68%

Mining and quarrying	1.30%	0.32%
Private individuals	23.70%	22.63%
Professional and business services	3.23%	3.67%
Real estate	7.01%	1.01%
Transport, communication and storage	21.45%	25.47%
Wholesale, retail, hotels and restaurants	9.44%	11.45%
Others	12.67%	11.93%
Total	100.00%	100.00%

(c) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting its obligations arising from its financial liabilities. Prudent and careful management of the Group's liquidity position is essential in order to ensure that adequate funds are available to meet the Group's ongoing financial obligations. Prudent liquidity risk management implies maintaining sufficient cash, marketable securities and the availability of funding through an adequate amount of committed credit facilities. Due to the dynamic nature of the underlying business of the Group, management aims at maintaining flexibility in funding by keeping committed credit lines available.

A summary of the contractual maturity analysis of the Group's borrowings and other non-derivative financial liabilities as at 30 June is set out below on an undiscounted basis including estimated interest payments:

Group			Coi	ntractual cash flow	s

Additional details relating to MFL are set out below:

In order to comply with the Reserve Bank's requirements and the Banking Act 1995, MFL must hold as liquid deposits an amount equivalent to 10% of its total borrowed funds. The MFL Board ensures that the investment standalone is sufficient to meet the Unimpaired Liquid Assets Ratio requirements which are covered entirely by long term bonds.

The daily liquidity position is monitored. For MFL, the key measure used for managing liquidity risk is the ratio of net liquid assets to deposits from customers. Monthly maturity mismatch reports are prepared and analysed. Maturity reports of term deposits are actioned via pre-analysis (calling customer to determine the status of re-investment) and MFL Board Asset and Liability Committee (ALCO) is kept informed.

MFL further addresses its liquidity risk via a letter of comfort from the Company pledging its support and assistance as required to ensure that MFL maintains capital and liquidity levels to enable it at all times to meet its obligations as and when due.

MFL's liquidity exposure is measured by calculating its Net Liquidity Gap and by comparing current ratios with targets. MFL Board/ ALCO monitors MFL's liquidity position by reviewing the Net Liquidity Gap expressed as a percentage of liabilities:

	Less than	1 to <3	3 to <6	6 to <12	Over 12
	1 month	months	months	months	months
Net Liquidity Gap as a % of Rate	5%	7%	10%	20%	40%
Sensitive Assets (not to exceed)					

Apart from the above, MFL uses the following as a benchmark in monitoring its liquidity position.

Ratio	<u>Target</u>	Tolerance Range
Cash Reserve	Minimum 8%	Not to fall below 5%
Liquid Assets/Total Deposits Ratio	20-25%	Not to fall below 20%
Liquid Asset/Total Assets Ratio	10-20%	Not to fall below 10%
Loans/Deposit Ratio	120-135%	Not to exceed 135%
Loans/Adjusted Deposit Ratio	100-120%	Not to exceed 120%
Unimpaired Liquid Assets Ratio	Minimum 12%	Not to fall below 10%

The Cash Reserve ratio is calculated by expressing cash reserves (comprising of cash book balance and short term deposits) as a percentage of total deposits. Other ratios are calculated according to RBF guidelines on liquidity risk management for credit institutions. The loans to deposit ratio and unimpaired liquid assets ratio are monitored daily whilst other ratios are monitored monthly. Any variance in the above ratios are actioned immediately by management.

5. FINANCIAL RISK MANAGEMENT (continued)

5 1 Risk Management Framework (continued)

(c) Liquidity risk (continued)

During the year the loans to deposit ratio went below the set threshold and the liquid assets to total deposit and liquid asset to total assets ratios went above the set threshold due to excess liquidity in the market and a decrease in the loan portfolio. MFL has implemented strategies to decrease the term deposit portfolio to realign the ratios with the set thresholds.

Other than the above, the other targets were met.

5.2 Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital and be in compliance with statutory requirements.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (as shown in the statement of financial position) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the statement of financial position plus net debt.

The gearing ratio of the Group at balance date is as follows:

	Note	2025	2024
		\$'000	\$'000
Total Borrowings (excluding deposits from customers)		209,256	166,459
Less: Cash and cash equivalents	11	69,701	32,253
Net debt		139,555	134,206
Total capital (Total equity plus net debt)		547,287	496,993
Gearing ratio		25%	27%

Additional details relating to MFL are set out below:

MFL is subject to externally imposed capital requirements by the Reserve Bank of Fiji. MFL's objectives when managing capital are:

- To comply with the capital requirements set by the Reserve Bank of Fiji:
- To safeguard MFL's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of the business.

Capital adequacy and the use of regulatory capital are monitored daily by MFL's management, employing techniques based on the guidelines developed by the Basel Committee as implemented by the Reserve Bank of Fiji, for supervisory purposes.

The Reserve Bank of Fiji requires MFL to (a) hold at least 10% of its total holdings in liquid assets and (b) maintain a ratio of total regulatory capital to risk-weighted assets at or above 15%. MFL complied with these requirements during the year and as at yearend.

6.	Profit	Group		Company

		24,873	23,652		
		· · · · · · · · · · · · · · · · · · ·			

As at 30 June 2025, group entities had unrecouped income tax losses of approximately \$23.362 million (2024: \$23.082 million) available to offset against future years' taxable income. The benefit at 25% (2024: 25%) tax rate amounting to approximately \$5.8 million (2024: \$5.8 million) has not been brought to account as realisation is not considered to be probable. Under the existing income tax laws, assessed tax losses can be carried forward for 8 years in succession for losses incurred from 1 January 2019. The benefit will only be obtained if:

- (i) the group entities derive future assessable income of a nature and of an amount sufficient to enable the benefits from the deductions for the losses to be realised;
- (ii) the group entities continue to comply with the conditions for deductibility imposed by the law; and
- (iii) no change in tax legislation adversely affect the group entities in realising the benefit from the deductions for the losses.

Tax losses carried forward expire as follows:

Tax losses year	Gross amount	Tax effect	Expiry date
	\$'000	\$'000	
2023	4,933	1,233	2031
2022	4,557	1,139	2030
2021	5,218	1,305	2029
2020	6,610	1,653	2028
2019	2,044	511	2027
	23,362	5,841	

8. Income Tax (Continued)

i. Real estate leases

The Group leases land and buildings for its office space, retail stores, terminal check-in booth, sales booths and engineering and stores workshop. The Group also leases land for island day trips (South Sea Island and Malamala). The leases typically run for a period of two to twenty years except for land leased for island day trips which is typically for twenty-five years and certain land leases which are for ninety-nine years. Some leases include an option to renew the lease for an additional period in accordance with the lease contracts after the end of initial lease term. Some leases provide for additional rent payments that are based on changes in the consumer price index.

9. Leases (continued)

(a) As a lessee (continued)

i. Real estate leases (continued)

Variable lease payments based on passenger numbers

Land leases for island day trips contain variable lease payments that are based on the number of passengers that would have landed on the island and depending on the package type that the guest would have purchased available at the islands. These payment terms are common for cruise service providers in Fiji. Fixed and variable rental payments for the period ended 30 June 2025 is as follows:

		Variable	
	Fixed payments	payments	Total payments
	\$'000	\$'000	\$'000
Leases with lease payments based on passenger number			
	107	354	461

The Group expects the relative proportions of fixed and variable lease payments to remain broadly consistent in future years.

ii. Other leases

The Group leases coaches for guest services from resorts and airports, with lease terms of three to five years and jetty for berthing of the vessels, with lease terms of two to nine years. Some leases include an option to renew the lease for an additional period in accordance with the lease contracts after the end of initial lease term. The Group also leases IT equipment with contract terms of five years.

Variable lease payments based on passenger numbers and additional services

Coach leases contain variable lease payments that are based on the number of passengers, charters depending on the point of pick-up or drop-off, additional runs to those contracted and monthly fuel prices. Lease for jetty contains variable lease payments for passenger levy which is based on the number of passengers on board the vessels from and to Port Denarau Marina. These payment terms are common for cruises service providers in Fiji. Fixed and variable rental payments for the period ended 30 June 2025 is as follows:

		Variable	
	Fixed payments	payments	Total payments
	\$'000	\$'000	\$'000
Leases with lease payments			
based on passenger number	694		694

The Group expects the relative proportions of fixed and variable lease payments to remain broadly consistent in future years.

iii. Extension options

Some leases contain extension options exercisable by the Group up to one year before the end of the non-cancellable contract period. Where practicable, the Group seeks to include extension options in new leases to provide operational flexibility. The extension options held are exercisable only by the Group and not by the lessors. The Group assesses at lease commencement whether it is reasonably certain to exercise the extension options, and reassesses this if there is a significant event or significant change in circumstances within its control.

10. Dividends Declared

	Group	Group		Company	
	2025 \$'000	2024 \$'000	2025 \$'000	2024 \$'000	
Dividend declared at \$0.0270 (2024: \$0.0266)	8,225	8,104	8,225	8,104	
	8,225	8,104	8,225	8,104	

11. Cash and Cash Equivalents

a) For the purposes of the cash flow statement, cash and cash equivalents comprise the following:

	Note	Group		Company	
		2025 \$'000	2024 \$'000	2025 \$'000	2024 \$'000
Cash on hand and at bank		69,701	32,253	3,332	5,119
	_	69,701	32,253	3,332	5,119
Bank overdrafts	27	(11,720)	(8,247)	-	-
	_	57,981	24,006	3,332	5,119

b) Financing facilities

Facilities available to the Group include bank overdrafts. Financing facilities of \$31,949,000 were available to the Group as at 30 June 2025 (2024: \$31,949,000) of which \$11,720,000 (2024: \$8,247,000) was utilised. Financing facilities of \$20,000,000 were available to the Company as at 30 June 2025 (2024: \$20,000,000) of which \$Nil (2024: \$Nil) was utilised. See also note 27.

Additions	-	-	-	43	36	79
Depreciation	_	-	-	(120)	-	(120)
Carrying amount at 30 June 2024	-	-	-	131	49	180

- (c) The depreciation policy is set out in Note 3.5.
- (d) See note 27 for items charged as security.
- (e) In 2025, the island property in Nanuya Lailai Island Yasawa, was revalued by the Directors of Blue Lagoon Cruises Pte Limited based on an independent valuation by Professional Valuations Pte Limited dated 30 June 2025. The revaluation had been categorised as a Level 3 fair value based on the inputs to the valuation technique used.
- (f) For group purposes, investment properties are transferred to property, plant and equipment when they are occupied by group entities. There is impact on profit or loss of this transfer as investment properties are held at fair value. Upon transfer the change in fair value of investment properties that are occupied by group entities are reversed and depreciation charge is recorded.

Investment properties occupied by the Group are transferred to property, plant and equipment on consolidation. Changes in fair values are recognised as gains or losses in profit or loss and included in 'other income' or 'other expenses' as appropriate. All gains or losses are unrealised.

See note 27 for items charged as security.

Fair value hierarchy

The fair value of investment property was determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair value of the Group's investment property annually. The fair value measurement for all of the investment properties has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

Valuation technique and significant unobservable inputs

The following table shows the valuation technique used in measuring the fair value of investment properties, as well as the significant unobservable inputs used.

18. Investment Properties (continued)

Valuation technique and significant unobservable inputs (continued)

Valuation technique	Significant unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
whereby the comparable developments are compared to the subject properties on a common denominator with equated adjustments made to allow for differences and comparability. This approach considers the sale price levels of	Adjustments for: • tenure: (2025: (10%) - 10%; 2024: (10%) - 10%) • location: (2025: (20%) - 0%; 2024: (20%) - 0%) • size: (2025: (65%) - 20%; 2024: (65%) - 20%) • improvement: (2025: (0%) - (10%); 2024: (0%) - 10%) • time: (2025: 3% - 42%; 2024:3% - 32%) • improvement condition: (2025: (10%) - 10%; 2024: (10%) - 10%)	The estimated fair value would increase (decrease) if: - tenure was higher (lower) - location was higher (lower) - size was higher (lower) - improvement was higher (lower) - time was higher (lower) - improvement condition was higher (lower)
Discounted cash flows: The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental growth rate, vacancy rate and other costs not paid by tenants. The expected net cash flows are discounted using riskadjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary), tenant credit quality and lease terms.	- Expected market rental growth (2025: 0% - 2.5%) (2024: 0% - 2.5%) Vacancy rate: (2025: 0% - 8%) (2024: 0% - 8%) - Discount rate: (2025: 8.15% - 10.35%) (2024: 8.15% - 10.72%) - Capitalisation rate: (2025: 7.3% to 805%) (2024: 7.5% - 8.5%) - Period of cash flows: (2025: 11 years) (2024: 11 years) - Recoverable expenses: (2025: 70%) (2024: 70%)	The estimated fair value would increase (decrease) if: - expected market rental growth were higher (lower); - vacancy rate was lower (higher); - discount rate was lower (higher); - capitalisation rate was lower (higher); - period of cash flow was higher (lower); or - recoverable expenses were higher (lower).
Income capitalisation: The valuation model considers the estimated net rental income from the property after allowing for the outgoings from management, ground rental, insurance, repairs and maintenance and other related property outgoings. The potential income derived from the property is directly related to the capital value.	- Annual rental - Outgoings - Capitalisation rate: (2025: 5% - 8%) (2024: 5% - 8.50%)	The estimated fair value would increase (decrease) if: - annual rental was higher (lower) - outgoing was lower (higher) - capitalisation rate was lower (higher)

Borrowing costs

Borrowing costs amounting to \$2,503,521 (2024: \$2,635,000) in relation to construction of buildings were capitalised to investment properties during the year.

19.	Intangible Assets	Group		Company	
		2025	2024	2025	2024
		\$'000	\$'000	\$'000	\$'000

	Management rights	1,877	2,377	-	-
	Software	775	643	-	
	Total intangible assets	57,641	58,728	-	
	Movements during the year are as follows:				
	Opening net book amount	58,728	59,063	-	_
	Additions	322	112	-	-
	Transfers from property, plant and equipment	81	274	-	-
	Impairment charge	(719)	-	-	-
	Amortisation of software	(271)	(221)	-	-
	Amortisation of management rights	(500)	(500)	-	
	Total intangible assets	57,641	58,728	-	

The accounting policy on intangible assets is set out in Note 3.9 and impairment loss on goodwill is recognised in profit or loss.

(a) FHL Retailing Pte Limited

Impairment test for goodwill

Goodwill of \$12.112m has been tested for impairment by reviewing the underlying net assets supporting the investment in subsidiary which holds the Group's 51% investment in RB Patel Group Limited.

Management value the investment in RB Patel Group Limited at fair value less estimated costs to sell which is significantly above cost and therefore have concluded that goodwill is not impaired. Fair value for RB Patel Group Limited has been determined based on quoted price of shares traded on the South Pacific Stock Exchange at 30 June 2025 of \$2.95 (2024: \$3.09) less estimated cost to sell. A decrease in RB Patel Group Limited's share price by more than \$2.29 (2024: \$2.46) would result in impairment. The fair value measurement was categorised as a Level 1 fair value based on quoted prices. The carrying amount of the cash generating unit (CGU) in 2025 was determined to be lower than its recoverable amount of \$221.183 million (2024: \$224.238 million).

(b) South Sea Cruises Pte Limited

Impairment test for goodwill

Goodwill of \$41.099m has been tested for impairment by reviewing the underlying net assets supporting the investment in subsidiary. The recoverable amount of this CGU was based on its value in use, determined by discounting the future cash flows to be generated from the continuing use of the CGU. The carrying amount of the CGU was determined to be lower than its recoverable amount of \$194,311,000 (2024: \$189,244,000). The key assumptions used in the estimation of value in use were as follows:

	2025	2024
Discount rate	14.50%	14.50%
Terminal value growth rate	1.00%	1.00%
Budgeted EBITDA growth rate (average of next five years)*	12.00%	10.00%

The discount rate was a post-tax measure based on the rate of 30-year US government bonds issued by the government in the relevant market and adjusted for country risk and an inflation differential to reflect the same currency as the cash flows, further adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific CGU. The pre-tax discount rate was 18.59% (2024: 18.92%).

^{*} Five years of cash flows were included in the discounted cash flow model. A long-term growth rate into perpetuity has been determined as the nominal gross domestic product (GDP) rates for Fiji.

19. Intangible Assets (continued)

(b) South Sea Cruises Pte Limited (continued)

Budgeted EBITDA was based on expectations of future outcomes taking into account past experience, adjusted for the anticipated revenue growth. Revenue growth was projected taking into account the average growth levels experienced over the past five years and the estimated sales volume and price growth for the next five years.

Management has identified that a reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount

(c) Fiji Television Limited

Impairment test for goodwill

Goodwill of \$1.984m has been tested for impairment by reviewing the underlying net assets supporting the investment in subsidiary which holds the Group's 59.4% investment in Fiji Television Limited. Management value the investment in Fiji Television Limited at fair value less estimated costs to sell which was below cost and therefore an impairment of \$0.713m was done. Fair value for Fiji Television Limited has been determined based on quoted price of shares traded on the South Pacific Stock Exchange at 30 June 2025 of \$0.75 (2024: \$2.00) less estimated cost to sell. A further decrease in Fiji Television Limited's share price would result in further impairment. The fair value measurement was categorised as a Level 1 fair value based on quoted prices.

^{*} The results of these subsidiaries have been consolidated in the carrying value of FHL Retailing Pte Limited, South Sea Cruises Pte Limited and FHL Media Pte Limited respectively.

Equity securities designated as at FVOCI

The Company and the Group has designated the investments shown above as equity securities as at FVOCI because these equity securities represent investments that the Company and the Group intends to hold for the long-term for strategic purposes.

Dividend income recognised during the year is disclosed in Note 21.

No strategic investments were disposed of during 2025, and there were no transfers of any cumulative gain or loss within equity relating to these investments.

(c) Valuation of financial instruments

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: fair value is calculated using quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: fair value is estimated using inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).
- Level 3: fair value is estimated using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

vii. Pacific Cement Pte Limited - Overdraft facilities of \$4,500,000 were available to the subsidiary company as at 30 June 2025 (2024: \$4,500,000) of which \$nil (2025: \$nil) was utilised. The overdraft facilities attract interest at a rate of 2.99% (2024: 2.99%) per annum. The overdraft facility is secured by a first registered security interest agreement given by the subsidiary company over all its rights, property and undertaking, of whatever kind and wherever situated, whether present or after acquired and it includes called or uncalled and paid or unpaid capital.

27. Borrowings (continued)

At the reporting date, FHL Properties Pte Limited held borrowings from Bred Bank related to the construction of the FHL Tower and renovation of Ratu Sukuna House. These borrowings are classified as non-current liabilities based on the Group's right to defer settlement for at least 12 months after the reporting date, as supported by the terms of the loan agreements.

During the year, FHL Properties Pte Limited was not in compliance with certain financial covenants associated with the FHL Tower loan. Specifically, the debt service coverage ratio and adjusted gearing ratio covenants were breached due to delays in the completion of the FHL Tower and the resulting postponement in rental income generation.

A formal waiver was obtained from Bred Bank prior to the reporting date, confirming that no event of default had occurred and that the loan terms remain unchanged. This waiver supports the continued classification of the liability as non-current under IAS 1.

Management has assessed the risk of future non-compliance with covenants that are required to be tested after the reporting date. While the waiver addresses the current breach, there remains a risk of future covenant breaches depending on the timing of rental income and strata sales. Should future non-compliance occur, it may trigger early repayment provisions under the loan agreement.

To mitigate this risk, management is actively engaging with the lender to renegotiate the terms of the loan, with the aim of aligning covenant requirements with the revised project timelines and expected cash flows. The Company will continue to monitor covenant compliance on a quarterly basis and maintain open communication with the lender. The Company also maintains access to undrawn facilities, including \$3.6 million overdraft facilities, which may be utilized to manage liquidity if required.

Shares have no par value.

All ordinary shares rank equally with regard to the Company's residual assets.

29. Reserves

Asset revaluation reserve

The asset revaluation reserve consists of increments arising from the revaluation of the Group's property, plant and equipment.

Common control reserve

The acquisition of FHL Media Pte Limited in 2013 was accounted for as a common control transaction as at the time of this transaction both FHL Media Pte Limited and the Company were controlled by the same shareholder group. As a common control transaction, the acquisition did not reflect the fair value of assets and liabilities acquired or recording of additional goodwill at the time of the acquisition of FHL Media Pte Limited. The acquisition balance sheet of FHL Media Pte Limited reflected the carrying values for assets and liabilities acquired from FHL Media Pte Limited's consolidated accounting records. The difference between the fair value of the consideration given and the carrying value of the assets and liabilities acquired was recognised as a common control reserve in the consolidated financial statements. Upon disposal of all interests in FHL Media Pte Limited by the Group, this reserve will be transferred to retained earnings.

Fair value reserve

Fair value reserve consists of subsequent changes in the fair value of investments in equity instruments that are not held for trading.

Foreign currency translation reserve

The foreign currency translation reserve relates to foreign currency translation as at year end on consolidation of subsidiary companies operating in foreign jurisdictions whose financial statements and transactions are denominated in a currency other than the functional and presentation currency of the Group.

Other equity reserve

Other equity reserve relates principally to acquisition of minority interest shareholdings in Blue Lagoon Cruises Pte Limited and RB Patel Group Limited and disposal of shares in Merchant Finance Pte Limited to minority interests without loss of control.

30. Lease Commitments

Short term lease commitments

The Group has a number of leases with less than 12 months of lease term for which no right of use assets and lease liabilities have been recognised.

Operating lease commitments - where a group company is the lessor

The group leases certain properties at varying terms and conditions. The future minimum lease payments receivable under these leases are as follows:

Not later than 1 year	6,054	4,575	-	-
Later than 1 year but not later than 5 years	12,748	7,400	-	-
Later than 5 years	4,160	3,517	-	-
	22.962	15.492	_	_

Amounts recognised in profit or loss

During 2025, investment property rentals of \$9.699 million (2024: \$8.518 million) were included in 'Operating revenue'. Direct operating expenses (including repairs and maintenance), were as follows:

Income-generating property	1,498	1,131	_	-
	1,498	1,131	-	-

31. Earnings Per Share

The calculation of earnings per share at 30 June 2025 was based on the profit attributable to ordinary shareholders of \$34.027 million (2024: \$40.445 million) and a weighted average number of ordinary shares outstanding of 304.647 million (2024: 304.647 million), calculated as follows:

	Group	
	2025	2024
	\$'000	\$'000
Profit after income tax attributable to members of the Company	34,027	40,445
Weighted average number of shares outstanding ('000)	304,647	304,647
Basic and diluted earnings per share	0.11	0.13

32. Contingent Liabilities

	Group		Company	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Non-performance guarantees given by the bank on behalf of group entities Non-performance guarantees given by the bank on behalf of	822	855	-	-
the Company	50	50	50	50

In the opinion of the directors, no loss is anticipated in respect of the above contingent liabilities.

The Company has provided a letter of support to certain subsidiary companies, Life Cinema Pte Limited and FHL Properties Pte Limited, undertaking that in the next 12 months it will provide sufficient financial assistance as and when it is needed to enable the subsidiary companies to continue operations and meet their financial obligations.

The Company has provided a corporate guarantee limited to 30% of the borrowings for Ritam Investments Pte Limited with ANZ.

33. Capital Commitments

	Group		Company	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Commitments for capital expenditure not provided for in the				
financial statements are as follows:				
Approved and contracted*	2,373	7,106	-	

Commitments in respect of loans and approved credit commitments offered but not yet advanced as at balance date amounted to approximately \$nil (2024: \$nil).

34. Related Party Information

Directors

The following were directors of the Company at any time during the financial year:

Rokoseru Nabalarua - Chairman Sakiusa Raivoce - Deputy Chairman Anthony Whitton Litiana Loabuka - Retired on 31 October 2024

Ilimotama Cawi - Re-appointed on 31 October 2024

Alifereti Kikau - Retired on 31 October 2024

Kamal Haer Semi Lotawa Anare Jale

Marica Rokovada - Appointed on 31 October 2024 Savenaca Seniloli - Appointed on 31 October 2024

Amounts paid to the directors during the year are disclosed in Note 6(b).

Identity of related parties

All material ownership interests in related parties are disclosed in Note 21. The Group also has related party transactions within the Group which are eliminated upon consolidation.
